

CORE TECHNICAL STACK

Workflow Automation

n8n (Cloud & Self-Hosted)

Webhooks

REST APIs

Docker

AI & LLM Integration

Claude API

Claude Code Agent

Prompt Engineering

OpenAI

Languages & Tools

JavaScript

Python

JSON Parsing

Git / Terminal

CRM & Platforms

HubSpot

Slack API

Telegram Bots

Airtable

PostgreSQL

KEY CAPABILITIES

- Custom n8n Code Node Scripting
- Autonomous Lead Scoring Pipelines
- Multi-Channel Messaging Alerts
- Error Handling & Fallback Workflows
- API Auth (OAuth2, API Keys, Tokens)

SERVICES OFFERED

- Pure n8n Workflow Builds
- Claude AI Agent Lead Qualification
- End-to-End Sales Operations Automation

PROFESSIONAL SUMMARY

Results-driven **Automation & AI Systems Engineer** specializing in designing scalable back-end workflow pipelines using **n8n** and **Anthropic Claude AI**. Expert in connecting disparate software platforms, automated lead intake, sentiment/intent scoring, and context-aware CRM enrichment. Proven track record in building autonomous agents that eliminate manual operations and convert raw leads into structured business workflows.

FEATURED AUTOMATION PROJECTS

Autonomous AI Lead Management Agent

n8n + Claude Code Integration

Lead Qualification & CRM Routing Engine

- Architected an automated multi-step lead processing pipeline in **n8n** capable of handling incoming webhooks from forms, emails, and landing pages.
- Integrated **Anthropic Claude API** / **Claude Code** prompts to autonomously score lead intent, extract key client requirements, and assign lead priority tiers.
- Configured instant bi-directional data syncing across HubSpot, Google Sheets, and PostgreSQL databases.
- Designed real-time automated team notifications with lead summaries via Telegram and Slack.

Pure n8n Webhook & API Infrastructure

Backend Automation

Data Plumbing & API Synchronization

- Built deterministic n8n workflows utilizing custom JavaScript code nodes for complex JSON transformation and payload restructuring.
- Implemented secure authentication flows using OAuth2 and custom API headers across third-party SaaS services.
- Engineered robust error-handling subprocesses with automated retries and failure notification alerts to ensure 99.9% pipeline uptime.

Multi-Channel Communication & Alert System

Messaging Automation

Telegram, Slack & Email Integration

- Automated direct-to-sales alerts by capturing live client inquiries and generating AI-assisted response drafts for immediate follow-up.
- Deployed self-hosted n8n instances on VPS infrastructure using Docker, optimizing server resource allocation and API rate limits.
